Custom Capabilities

Hear yourself think®
Unika Vaev Design Studio can work directly with an architect or a designer to translate their vision to meet space, budget and acoustic criteria.

The felt faced polyester ecoustic® panels in 34 colorways can be easily cut to any shape thereby providing designers with almost infinite freedom of expression.

Our recent introduction of ecoustic® solid core panels have broadened our custom design capability into clouds, baffles, dimensional walls, sculptures, graphics and LED lights.

Acoustic LED Lighting (3)

Custom Ceiling (6)

Custom Wall (17)

Custom Screen (41)

Branding (48)
